

Integrated Energy Solutions for a Healthy & Sustainable World

Greenleaf Advisors and its energy service partners deliver integrated and sustainable energy solutions for industrial, commercial, and institutional customers. Services include intelligent solar with storage; microgrids; cogeneration; and sustainable design to improve energy efficiencies, economics and resiliency for operational performance.

GREENCITY POWER

GreenCity Power (GCP) (greencity-power.com) is delivering electricity, heating, and cooling to building owners economically and securely through natural gas sourced co-generation and thermal systems, and innovative solutions to peak demand management. GCP will design, build/acquire, capitalize and operate co-generation and thermal systems for their customers, using only proven technologies and drawing on their 40+ years of experience. Their systems offer customers in the industrial, commercial and institutional markets increased profitability and power resiliency, greener buildings, and a flexible fee structure.

One Penn Plaza, NY

INTELLIGENT GENERATION

Intelligent Generation (IG) (intelgen.com) has developed a software service that elevates solar systems' performance and economics when associated with an energy storage system. The cloud-based system, reduces costs by using stored energy when regional power demands and pricing is high, as well as to generate attractive revenues by deploying the assets into the wholesale power markets. IG combines the intelligence of customers' local energy situations into a networked solution, and then provisions that network of batteries to grid operators as a reliable, predictable, and valuable source of power.

GRUMMAN/BUTKUS ASSOCIATES

Grumman/Butkus Associates (G/BA) (grummanbutkus.com) is an award-winning energy efficiency consultancy and sustainable design engineering firm specializing in energy and resource consulting. Guided by sustainability principles, G/BA is recognized nationally for its work and expertise in both demand and supply side management, with awards including the US DoE's Energy Innovation Awards and Practice GreenHealth's Champion for Change award. G/BA dedicate themselves to "engineering excellence, attentive service, and continued growth," bringing their expertise to the healthcare, government, higher education, residential, commercial and hotel among other markets.

G&W ELECTRIC

G&W Electric (G&W) (gwelec.com) has energized and powered the world since 1905. With over a century of expertise in implementing innovative power systems, G&W uses the latest technologies in load and fault interrupting switchgear, reclosers, system protection equipment and distribution automation to create custom solutions for their clients. Likewise, G&W is bringing its expertise to the renewable energy market via wind and solar applications through product offerings like their Lazer Automation system and wind & solar switchgear technologies. Together with IG, G&W is developing and advancing integrated, smart microgrid solutions to multiple markets looking for clean, green and resilient power.

Bridging Enterprises for a Healthy and Sustainable World

About Greenleaf Advisors

Greenleaf Advisors® is a **consulting** and **transaction-services** firm that helps enterprises and communities develop sustainably by bridging the resources and strategies they need to grow in a healthy way. We engage at the intersection of capital, business, science and policy to address the sustainable use of Earth's natural resources—land, water, materials, and energy.

Our strength comes from the experience of our Staff, Service Partners and Board of Advisors. We work across disciplines and sectors to deliver solutions to complex challenges that threaten natural resources and the services they afford society. We engage science, policy and business leadership to achieve lasting sustainable results.

Land

Land use, protection, conservation, stormwater management, and soil health for sustainable agricultural production and water quality.

Water

Conservation, reduced nutrient loading in waterways, water resource management, and water treatment technologies.

Materials

Market reuse of industrial materials and commercialization of technologies that treat and reuse resources from waste streams.

Energy

Co-generation, renewables (e.g. solar) and energy storage on the supply side, as well as demand management.

For more information, or to discuss potential projects or collaborations, please contact John Andersen, jandersen@greenleafadvisors.net or Katie DeMuro, kdemuro@greenleafadvisors.net at Greenleaf Advisors.
